Set-theoretic Consistency Results and Topological Theorems Concerning the Normal Moore Space Conjecture and Related Problems Oct 15 2019

Papers Jul 04 2021

Handbook of the History of General Topology Mar 12 2022 This book is the first one of a work in several volumes, treating the history of the development of topology. The work contains papers which can be classified into 4 main areas. Thus there are contributions dealing with the life and work of individual topologists, with specific schools of topology, with research in topology in various countries, and with the development of topology in different periods. The work is not restricted to topology in the strictest sense but also deals with applications and generalisations in a broad sense. Thus it also treats, e.g., categorical topology, interactions with functional analysis, convergence spaces, and uniform spaces. Written by specialists in the field, it contains a wealth of information which is not available anywhere else.

Bing Crosby Dec 09 2021 "The best thing to happen to Bing Crosby since Bob Hope," (WSJ) Gary Giddins presents the second volume of his masterful multi-part biography Bing Crosby dominated American popular culture in a way that few artists ever have. From the dizzy era of Prohibition through the dark days of the Second World War, he was a desperate nation's most beloved entertainer. But he was more than just a charismatic crooner: Bing Crosby redefined the very foundations of modern music, from the way it was recorded to the way it was orchestrated and performed. In this much-anticipated follow-up to the universally acclaimed first volume, NBCC Winner and preeminent cultural critic Gary Giddins now focuses on Crosby's most memorable period, the war years and the origin story of White Christmas. Set against the backdrop of a Europe on the brink of collapse, this groundbreaking work traces Crosby's skyrocketing career as he fully inhabits a new era of American entertainment and culture. While he would go on to reshape both popular music and cinema more comprehensively than any other artist, Crosby's legacy would be forever intertwined with his impact on the home front, a unifying voice for a nation at war. Over a decade in the making and drawing on hundreds of interviews and unprecedented access to numerous archives, Giddins brings Bing Crosby, his work, and his world to vivid life--firmly reclaiming Crosby's central role in American cultural history.

Wireless Internet Aug 05 2021 This book constitutes the refereed post-conference proceedings of the 11th International Conference on Wireless Internet, WiCON 2018, held in Taipei, Taiwan, in October 2018.

The 36 full papers were selected from 79 submissions and are grouped into the following topics: wireless network, artificial intelligence, security, IoT, location-based services, financial applications, vehicular ad hoc network, services and applications.

Rough Set and Knowledge Technology Sep 06 2021 This book constitutes the refereed proceedings of the 6th International Conference on Rough Sets and Knowledge Technology, RSKT 2011, held in Banff, Canada, in September 2011. The 89 revised full papers presented together with 3 keynote lectures and 1 invited tutorial session were carefully reviewed and selected from 229 submissions. The papers are organized in topical sections on attribute reduction and feature selection, generalized rough set models, machine learning with rough and hybrid techniques, knowledge technology and intelligent systems and applications.

[The Wayside School 4-Book Collection](#) Jan 10 2022 All four books in the beloved Wayside School series by bestselling and Newbery Medal-winning author Louis Sachar are now available in one fun and convenient collection! This ebook features all four books, each with new cover and interior art and full of hilarious stories, zany art, and a quadruple serving of absurdity. More than fifteen million readers have laughed at the stories of Sideways Stories from Wayside School, Wayside School Gets a Little Stranger, Wayside School Is Falling Down, and the newly released Wayside School Beneath the Cloud of Doom. So what are you waiting for? Come visit Wayside School!

Reviews of Papers in Algebraic and Differential Topology, Topological Groups, and Homological Algebra Feb 11 2022

Ink Art May 02 2021 "Featuring 70 works in various media--paintings, calligraphy, photographs, woodblock prints, video, and sculpture--that were created during the past three decades, Ink Art: Past as Present in Contemporary China will demonstrate how China's ancient pattern of seeking cultural renewal through the reinterpretation of past models remains a viable creative path. Although all of the artists have transformed their sources through new modes of expression, visitors will recognize thematic, aesthetic, or technical attributes in their creations that have meaningful links to China's artistic past. The exhibition will be organized thematically into four parts and will include such highlights as Xu Bing's dramatic Book from the Sky (ca. 1988), an installation that will fill an entire gallery; Family Tree (2000), a set of vivid photographs documenting a performance by Zhang Huan in which his facial features--and his identity--are obscured gradually by physiognomic texts that are inscribed directly onto his face; and Map of China (2006) by Ai Weiwei, which is constructed entirely of wood salvaged from demolished Qing dynasty temples." --

Discrete Geometry Jun 03 2021 Celebrating the work of Professor W. Kuperberg, this reference explores packing and covering theory, tilings, combinatorial and computational geometry, and convexity, featuring

an extensive collection of problems compiled at the Discrete Geometry Special Session of the American Mathematical Society in New Orleans, Louisiana. Discrete Geometry analyzes packings and coverings with congruent convex bodies, arrangements on the sphere, line transversals, Euclidean and spherical tilings, geometric graphs, polygons and polyhedra, and fixing systems for convex figures. This text also offers research and contributions from more than 50 esteemed international authorities, making it a valuable addition to any mathematical library.

[Rich and Famous](#) Oct 27 2020 THE STORY: One of the world's oldest living promising young playwrights, Bing Ringling is finally about to be produced--with play number 844. But, unfortunately, his lady producer, having had a series of successes, now yearns for a flop--so she can

[John Guare](#) Jul 16 2022 Best known for his plays Six Degrees of Separation and The House of Blue Leaves, John Guare is a major figure in the contemporary American theater. Other notable works by Guare include Bosoms and Neglect, Landscape of the Body, and the Lydie Breeze series. His career began with off-off-Broadway experimentation in the sixties and continues through the present. In that time Guare has created many imaginative, eccentric plays that reflect the chaos, violence, and loneliness of life in our time. He frequently combines outrageous farce with painfully serious subject matter. This sourcebook is both a convenient reference and a resource for further investigation of Guare's works. The volume chronicles his achievements with a chronology and biographical essay. It also includes summaries of his published and unpublished plays, overviews of the critical reception of each work, production credits, a primary bibliography of dramatic and nondramatic writings, and extensive annotated bibliographies of reviews and other secondary material.

[Big-League Salesmanship](#) Sep 18 2022 Techniques that RAISE YOUR SCORE IN SELLING How a Big League salesman plans his time, builds a prospects interested proves his points. How a Big League salesman sizes up his prospects, appeals to their self-interest, makes his product look indispensable. How a Big League salesman turns complaints into reorders, finds leads everywhere, builds his own public relations program. How a Big League salesman finds out important information, gets ready for an interview, gets "over the fence" to his sale. How to give yourself a 25 per cent raise—right away How to make money in the first 30 seconds of a call How to make appointments that people are glad to keep How to make your sale 50 per cent sure—before your interview How to turn "I can get it cheaper" into "I'll buy now" How to turn an objection into a reason to buy now How to make it easy for your prospect to sell himself How to show extra value in anything you sell How to build a hard-hitting presentation How to develop the will to win HERE IS a treasure-chest of professional selling techniques, written for the man who has his eye on more sales, more income, and steady advancement. In this clearly written book you will find sure techniques for developing prospects—ways to open doors that rarely open. You will see how to give a really effective sales presentation, close a sale, make one sale lead to another—build steady, profitable accounts. Each chapter points out not only what to do but tells you how to do it. As a "refresher course" for the veteran or as an eye-opener for the rookie, big league salesmanship builds your ability, confidence and enthusiasm...gives you the know-how that backs up every sale.

[Xu Bing](#) Nov 20 2022 This volume offers a path-breaking reassessment of Xu Bing's oeuvre by analyzing the diverse cultural environments in which his work has developed since the Book from the Sky. It contains three lecture transcripts and eight art historical essays; these explore themes such as Xu's animal works, audience participation, new ink, prints, realism, socialist spectacle, and word play. A critical question addressed in this volume is what carries art to a global level beyond regional histories and cultural symbols. Absorbing critical essays on contemporary Chinese aesthetics addressing the social context and philosophical concerns that underlie Xu Bing's key works. The authors analyze Xu's art, shedding light on the tangled history of socialism and neoliberalism in the Post-Mao period. --Prof. Dr. Lothar Ledderose, Senior Professor, Institute of East Asian Art, Universität Heidelberg

Station Bulletin Dec 17 2019

[The Collected Papers of R.h. Bing](#) Feb 23 2023 A powerful mathematician and a great problem solver, R. H. Bing laid the foundation for a number of areas of topology. Many of his papers have continued to serve as a source of major theoretical developments and concrete applications in recent years. One outstanding example was Michael H. Freedman's use of Bing's Shrinking Criterion to solve the four-dimensional Poincaré Conjecture. This two-volume set brings together over one hundred of Bing's research, expository, and miscellaneous papers. These works range over a great variety of topics in topology, including the topology of manifolds, decomposition spaces, continua, metrization, general topology, and geometric topology. In addition, there are a number of papers in the areas of convex functions, linearity, and conformal varieties. The introductory section in the first volume provides historical background on Bing's life and achievements. This collection will appeal to mathematicians in all areas, and especially those in topology, as well as students, historians, and educators in the mathematical sciences, for it provides a complete historical summary of the mathematical events in the life of the man and the mathematician, R. H. Bing.

A History of Inverse Probability Jan 30 2021 It is thought as necessary to write a Preface before a Book, as it is judged civil, when you invite a Friend to Dinner, to proffer him a Glass of Hock beforehand for a Whet. John Arbuthnot, from the preface to his translation of Huygens's "De Ratiociniis in Ludo Aloo". Prompted by an awareness of the importance of Bayesian ideas in modern statistical theory and practice, I decided some years ago to undertake a study of the development and growth of such ideas. At the time it seemed appropriate to begin such an investigation with an examination of Bayes's Essay towards solving a problem in the doctrine of chances and Laplace's Theorie analytique des probabilités, and then to pass swiftly on to a brief consideration of other nineteenth century works before turning to what would be the main topic of the treatise, videlicet the rise of Bayesian statistics from the 1950's to the present day. It soon became apparent, however, that the amount of Bayesian work published was such that a thorough investigation of the topic up to the 1980's would require several volumes - and also run the risk of incurring the wrath of extant authors whose writings would no doubt be misrepresented, or at least be so described. It seemed wise, therefore, to restrict the period and the subject under study in some way, and I decided to concentrate my attention on inverse probability from Thomas Bayes to Karl Pearson.

Sideways Stories From Wayside School Oct 19 2022 There has been a terrible mistake. Instead of having thirty classrooms side by side, Wayside School is thirty storeys high! (The builder said he was sorry.) Perhaps that's why all sorts of strange and unusual things keep happening - especially in Mrs Jewls's classroom on the very top floor. There's the terrifying Mrs Gorf, who gets an unusually fruity comeuppance; Terrible Todd, who always gets sent home early; and Mauricia, who has a strange ice-cream addiction. Meanwhile, John can only read upside down, and Leslie is determined to sell her own toes. From top to bottom, Wayside is packed with quirky and hilarious characters who are all brought to life in this new edition with delightful illustrations by Aleksei Bitskoff throughout. This is an unmissable, irrepressible story of mixed-up mayhem from Louis Sachar, the bestselling author of Holes.
